Turn this...

...into this.

This winter season (23-24) we took advantage of the our time to improve with studies, classes, and seminars to get certified and to take The Cut to the next level. **We now offer a one-stop-shop solution for both lawn maintenance, and weed treatment and fertilization.** There is now no need to hire 2 companies to care for your lawn because we do it all, and typically at better rates than the large competitors. There is no risk and no contract, so there is nothing to lose, and much to gain!

Therefore, we are very happy to announce this new program, as The Cut will always be more than just mowing lawns. Our vision is to make your property "pop", robustly green and healthy year-round, standing out amongst your neighbors, and giving you that "I love my lawn" feeling every time you pull into your driveway.

The Cut Lawn Care Weed Control and Fertilization Program consists of 7 treatments for the year, with commercial quality fertilizers and weed control products. **Your lawn will reach maximum potential for healthier, thicker and more green turf.**

We use special formulated products in low concentrations that are designated for residential use and safe for kids and pets.

***Pricing varies by property**
Please call / text for estimate and schedule

- **Application 1 (Jan - Feb)**

Early season Pre and Post Emergent. Spring and summer weeds prevention before spring germination (very important)

- **Application 2 (Mar - Apr)**

Nutritional Supplement to get your lawn green for spring

- **Application 3 (Apr - May)**

Post Emergent Weed Treatment - Spot treatment for special weeds that were able to bypass previous treatment

- **Application 4 (Jun - Jul)**

Nutritional Supplements -
To grow strong and deep green

- **Application 5 (Jul - Aug)**

Post Emergent - Spot treatment of newer late-summer weeds

- **Application 6 (Sep - Oct)**

Fall Pre and Post Emergent. To eradicate any weeds that may be present and to keep cool season weeds at bay

- **Application 7 (Nov - Dec)**

PH Level Soil Supplement - Necessary to balance the PH Levels and increase your grasses ability to absorb nutrients and grow fuller. The thicker your grass the less weeds there will be.

***Pricing varies by property**

Please call / text for estimate and schedule. Typically each application is the same price as your mow price.
